WORKSHOP COMMITTEE

Why You Should Attend ?

Airway management is not just a skill—it's a life-saving art. This immersive, hands-on workshop is designed to upgrade your confidence and competence in handling both routine and complex airway scenarios.

✓ Master the Tools of Modern Airway Management

- Video Laryngoscopy
- Flexible Bronchoscopy
- Lung Isolation Techniques
- Emergency Front-of-Neck Access (FONA)(Goat Lung Model)

✓ Train with the Experts

Learn from experienced faculty through Hands on experience, interactive Case discussions, Video demonstrations, and Real-time feedback at skill stations.

✓ Practice Life-Saving Techniques in Realistic Settings

Gain hands-on experience in crisis airway scenarios, team dynamics, and decision-making strategies.

✓ Sharpen Your Strategy

Build a structured approach to the anticipated and unanticipated difficult airway—from Plan A to Plan D.

Workshop Objectives:

- To build proficiency in using advanced airway devices such as video laryngoscopes and flexible Bronchoscopes.
- To provide hands-on training in emergency airway access techniques, especially front-of-neck airway (FONA) procedures.
- To develop a systematic approach to difficult airway management, including planning for backup strategies (Plan B, C, and D).
- To train participants in effective lung isolation methods using double-lumen tubes and bronchial blockers.
- To enhance clinical decision-making through interactive case discussions and analysis

Stations :

- ***Airway Ultrasound***
- ***Lung Isolation Techniques***
- ***Video Laryngoscopes - Tips & Tricks***
- ***Flexible Bronchoscope Intubation on Simulators***
- ***Cricothyrotomy & Front of Neck Access (FONA)***

VIDEO SESSIONS

Deconstructing the Difficult Airway & Mastering Airway Rescue

Techniques: A Step-by-Step Guide.

VIDEO SESSION 1

***Preparation of the Airway
for Awake Intubation***

VIDEO SESSION 2

***Paediatric Airway
Management***

DEBRIEFING SESSION

***Incorporating Difficult
Airway Guidelines in Clinical
Decision-Making***

***Prioritizing Patient Safety & Optimizing Patient Outcomes is
“The Path to Safer Airway Practices”.***

The Workshop Committee.
